*Early Human Development*, 18 (1989) 301—303
Elsevier Scientific Publishers Ireland Ltd.

# Subject index

**A/B ratio**, umbilical artery velocimetry, intrauterine growth retardation, pulsatility index, resistance index, postnatal catch-up growth, 59
**abortion**, neonatal death, ethics, infant, 263
**academic skills**, small-for-gestational age infants, disproportionate growth, neurology, behavior, school age, 1
**acoustical stimulation**, fetus, intensity, frequency, cardiac acceleration/deceleration, motor response, heart rate variability pattern, 81
**amino acids**, neonates, urinary fractional excretion, 37

**Bayes' theorem**, infant behaviour, sudden infant death, risk factors, 101
**behavior**, small-for-gestational age infants, disproportionate growth, neurology, academic skills, school age, 1
**behavior**, temperament, premature, intracranial hemorrhage, 273
**blood flow velocity waveform**, fetal cerebral blood flow, fetal internal carotid artery, pulsatility index, hydrocephaly, 95
**blood flow velocity waveform**, uterine artery, Pulsatility-Index, pathological pregnancy, validity, 45
**breast milk**, fatty acids, diet fat, 185

**cardiac acceleration/deceleration**, fetus, acoustical stimulation, intensity, frequency, motor response, heart rate variability pattern, 81
**cesarean section**, newborn, stress, labour, gastrin, somatostatin, oxytocin, 73
**choline acetyltransferase**, Down's syndrome, foetal brain, gangliosides, neural cell adhesion molecule, lipid classes, 237
**circadian rhythm**, infants, sleep, feeding, 151
**congenital infection**, cytomegalovirus, twins, survey, 125
**crying**, posture, hand-mouth contact, 111
**cytomegalovirus**, congenital infection, twins, survey, 125

**diet fat**, breast milk, fatty acids, 185
**disproportionate growth**, small-for-gestational age infants, neurology, behavior, academic skills, school age, 1
**Down's syndrome**, foetal brain, gangliosides, neural cell adhesion molecule, lipid classes, choline acetyltransferase, 237

**ethics**, neonatal death, infant, abortion, 263
**exchange transfusion**, newborn, ionized calcium, 157
**extremely low birthweight infants**, growth and development, morbidity, 165
**eyelid**, NICU, illumination, state, premature, 13

**fatty acids**, breast milk, diet fat, 185
**feeding**, infants, sleep, circadian rhythm, 151
**fetal aortic flow**, pulsed Doppler, fetal flow velocity waveforms, human fetal circulation, fetal carotid flow, 213
**fetal carotid flow**, pulsed Doppler, fetal flow velocity waveforms, human fetal circulation, fetal aortic flow, 213
**fetal cerebral blood flow**, fetal internal carotid artery, pulsatility index, blood flow velocity waveform, hydrocephaly, 95
**fetal flow velocity waveforms**, pulsed Doppler, human fetal circulation, fetal aortic flow, fetal carotid flow, 213
**fetal internal carotid artery**, fetal cerebral blood flow, pulsatility index, blood flow velocity waveform, hydrocephaly, 95
**fetus**, acoustical stimulation, intensity, frequency, cardiac acceleration/deceleration, motor response, heart rate variability pattern, 81
**foetal brain**, Down's syndrome, gangliosides, neural cell adhesion molecule, lipid classes, choline acetyltransferase, 237
**frequency**, fetus, acoustical stimulation, intensity, cardiac acceleration/deceleration, motor response, heart rate variability pattern, 81

**gangliosides**, Down's syndrome, foetal brain, neural cell adhesion molecule, lipid classes, choline acetyltransferase, 237
**gastrin**, newborn, stress, labour, cesarean section, somatostatin, oxytocin, 73
**growth and development**, extremely low birthweight infants, morbidity, 165

**hand-mouth contact**, crying, posture, 111
**heart rate**, voices, mother, neonate, 27
**heart rate variability pattern**, fetus, acoustical stimulation, intensity, frequency, cardiac acceleration/deceleration, motor response, 81
**human fetal circulation**, pulsed Doppler, fetal flow velocity waveforms, fetal aortic flow, fetal carotid flow, 213
**hydrocephaly**, fetal cerebral blood flow, fetal internal carotid artery, pulsatility index, blood flow velocity waveform, 95

**illumination**, NICU, eyelid, state, premature, 13
**infant**, neonatal death, ethics, abortion, 263
**infants**, sleep, feeding, circadian rhythm, 151
**infant behaviour**, sudden infant death, Bayes' theorem, risk factors, 101
**intensity**, fetus, acoustical stimulation, frequency, cardiac acceleration/deceleration, motor response, heart rate variability pattern, 81
**intracranial hemorrhage**, behavior, temperament, premature, 273
**intrauterine growth retardation**, umbilical artery velocimetry, pulsatility index, A/B ratio, resistance index, postnatal catch-up growth, 59
**ionized calcium**, newborn, exchange transfusion, 157

**labour**, newborn, stress, cesarean section, gastrin, somatostatin, oxytocin, 73
**lipid classes**, Down's syndrome, foetal brain, gangliosides, neural cell adhesion molecule, choline acetyltransferase, 237

**marital history**, perinatal mortality, sibship, previous loss, secular trend, 199
**morbidity**, extremely low birthweight infants, growth and development, 165
**mother**, heart rate, voices, neonate, 27
**motor response**, fetus, acoustical stimulation, intensity, frequency, cardiac acceleration/deceleration, heart rate variability pattern, 81

**neonatal death**, ethics, infant, abortion, 263
**neonate**, heart rate, voices, mother, 27
**neonates**, amino acids, urinary fractional excretion, 37
**neural cell adhesion molecule**, Down's syndrome, foetal brain, gangliosides, lipid classes, choline acetyltransferase, 237
**neurology**, small-for-gestational age infants, disproportionate growth, behavior, academic skills, school age, 1
**neuromotor development**, preterm infants, perinatal illness, 137
**newborn**, ionized calcium, exchange transfusion, 157
**newborn**, stress, labour, cesarean section, gastrin, somatostatin, oxytocin, 73
**NICU**, illumination, eyelid, state, premature, 13
**normal newborns**, preference posture, spontaneous motor activity, specific movement patterns, video-analysis, 247

**oesophageal motility**, swallowing, sleep, 175
**oxytocin**, newborn, stress, labour, cesarean section, gastrin, somatostatin, 73

**pathological pregnancy**, blood flow velocity waveform, uterine artery, Pulsatility-Index, validity, 45
**perinatal illness**, preterm infants, neuromotor development, 137
**perinatal mortality**, marital history, sibship, previous loss, secular trend, 199
**postnatal catch-up growth**, umbilical artery velocimetry, intrauterine growth retardation, pulsatility index, A/B ratio, resistance index, 59
**posture**, crying, hand-mouth contact, 111
**preference posture**, spontaneous motor activity, specific movement patterns, normal newborns, video-analysis, 247
**premature**, behavior, temperament, intracranial hemorrhage, 273
**premature**, NICU, illumination, eyelid, state, 13
**preterm infants**, neuromotor development, perinatal illness, 137
**previous loss**, perinatal mortality, marital history, sibship, secular trend, 199
**Pulsatility-Index**, blood flow velocity waveform, uterine artery, pathological pregnancy, validity, 45
**pulsatility index**, fetal cerebral blood flow, fetal internal carotid artery, blood flow velocity waveform, hydrocephaly, 95

**pulsatility index**, umbilical artery velocimetry, intrauterine growth retardation, A/B ratio, resistance index, postnatal catch-up growth, 59
**pulsed Doppler**, fetal flow velocity waveforms, human fetal circulation, fetal aortic flow, fetal carotid flow, 213

**resistance index**, umbilical artery velocimetry, intrauterine growth retardation, pulsatility index, A/B ratio, postnatal catch-up growth, 59
**risk factors**, infant behaviour, sudden infant death, Bayes' theorem, 101
**risk factors**, small-for-gestational-age, screening, 191

**school age**, small-for-gestational age infants, disproportionate growth, neurology, behavior, academic skills, 1
**screening**, small-for-gestational-age, risk factors, 191
**secular trend**, perinatal mortality, marital history, sibship, previous loss, 199
**sibship**, perinatal mortality, marital history, previous loss, secular trend, 199
**sleep**, infants, feeding, circadian rhythm, 151
**sleep**, oesophageal motility, swallowing, 175
**small-for-gestational-age**, screening, risk factors, 191
**small-for-gestational age infants**, disproportionate growth, neurology, behavior, academic skills, school age, 1
**somatostatin**, newborn, stress, labour, cesarean section, gastrin, oxytocin, 73
**specific movement patterns**, preference posture, spontaneous motor activity, normal newborns, video-analysis, 247
**spontaneous motor activity**, preference posture, specific movement patterns, normal newborns, video-analysis, 247
**state**, NICU, illumination, eyelid, premature, 13
**stress**, newborn, labour, cesarean section, gastrin, somatostatin, oxytocin, 73
**sudden infant death**, infant behaviour, Bayes' theorem, risk factors, 101
**survey**, cytomegalovirus, congenital infection, twins, 125
**swallowing**, oesophageal motility, sleep, 175

**temperament**, behavior, premature, intracranial hemorrhage, 273
**twins**, cytomegalovirus, congenital infection, survey, 125

**umbilical artery velocimetry**, intrauterine growth retardation, pulsatility index, A/B ratio, resistance index, postnatal catch-up growth, 59
**urinary fractional excretion**, neonates, amino acids, 37
**uterine artery**, blood flow velocity waveform, Pulsatility-Index, pathological pregnancy, validity, 45

**validity**, blood flow velocity waveform, uterine artery, Pulsatility-Index, pathological pregnancy, 45
**video-analysis**, preference posture, spontaneous motor activity, specific movement patterns, normal newborns, 247
**voices**, heart rate, mother, neonate, 27
